

CS05 – Water Softener

Brief Description

CS05 Water Softener. The unit connects directly to electrical and water supplies. The resins are regenerated only when required, based on the volumetric water usage. Regeneration can be programmed without interfering with your activity. Salt refilling is easily done. Servicing the unit is effortless.

Technical Features

Dimensions:	200x400x480 mm
Max capacity:	3 m3/h
Weight:	8 kg
Min. operating pressure:	1,8 bar
Max. operating pressure:	5,0 bar
Incoming water temperature:	min. 5 °C max. 35°C
Power connection:	230 V - 50/60 Hz
Total installed load:	10 W
Resins content.....	3,5 litres
Resins disinfection kit:	INCLUDED
Type:	Volumetric
Salt consumption per regeneration cycle:	0,7 kg
Safety valve:	INCLUDED
Output (water produced):	
Calculated cyclic water @ 25°f:	700 litres
Calculated cyclic water @ 40°f:.....	450 litres
