

CS30 – Water Softener

Brief Description

CS30 Water Softener. The unit connects directly to electrical and water supplies. The resins are regenerated only when required, based on the volumetric water usage. Regeneration can be programmed without interfering with your activity. Salt refilling is easily done. Servicing the unit is effortless.

Technical Features

Dimensions:	320x500x1060 mm
Max capacity:	4 m ³ /h
Weight:	42 kg
Min. operating pressure:	1,8 bar
Max. operating pressure:	5,0 bar
Incoming water temperature:	min. 5 °C max. 35°C
Power connection:	230 V - 50/60 Hz
Total installed load:	10 W
Resins content:	30 litres
Resins disinfection kit:	INCLUDED
Type:	Volumetric
Salt consumption per regeneration cycle:	5,7 kg
Safety valve:	INCLUDED

Output (water produced):

Calculated cyclic water @ 25°f: 6000 litres

Calculated cyclic water @ 40°f: 3800 litres
