CANOSA DI PUGLIA | ITALY

IL GIARDINO DEL MAGO RECEPTIONS

BANQUETTING & CATERING

SET UP: BIZZOCA ARREDI COMMERCIALI SRL

A SPELL OF LOVE AND TECHNOLOGY

Among the ancient stones of Canosa di Puglia is an enchanted place, guardian of love stories and magic: Il Giardino del Mago Receptions. This architectural jewel, wrapped in a magical atmosphere, has the power to transform every event into an unforgettable experience, and every wedding into a fairytale.

Il Giardino del Mago Receptions welcomes its guests in an embrace of greenery and flowers, and transports them into a world where time stands still and every wish comes true.

But the real magic happens in the kitchen, where the chefs turn the best local ingredients into culinary masterpieces. Each dish is a journey of the senses, a spell for the palate and a delight for the soul. From the surprising colours and flavours of the appetisers, to the stories that each dish brings to the table, Apulian tradition and territory blend harmoniously during each service.

The banquet is a time of sharing and joy, an opportunity to bring friends and family together and celebrate love in all its facets. And in this enchanted kingdom, every detail is cared for with love and dedication, from the elegant tablecloths to the candles dancing in the moonlight, creating a magical atmosphere that enclose the bride and groom and their guests in an embrace of happiness.

Alberto Passoni
Electronics Designer, Smart Connectivity department, Comenda

Behind the scenes are those who work tirelessly to ensure that every detail is perfect. And in this endevour, technology blends harmoniously with tradition, thanks to the 20-year-long collaboration with Comenda Ali Group Srl. With an average of 450 events per year and around 250 guests per event, the property has faced a titanic challenge: managing non-stop washing shifts from 9 am to 9 pm. Guests, delighted by the delicacies on offer, leave behind an army of 70 dishes to be washed for each diner. This is where Comenda's technological touch comes into play, providing washing solutions to make the process flawless, efficient and lightweight for operators.

Thanks to Bizzoca Arredi Commerciali, Comenda's commercial partner and a landmark for the sale, installation and maintenance of catering machinery in Puglia and Basilicata, we have designed a model of AC2E NEXT series with unique accessories and configurations, the real secret behind the impeccable cleaning of their dishes.

Alberto Passoni, Electronics Designer at Comenda's Smart Connectivity department, tells us: "We've worked to ensure that technology blended harmoniously with the magic of this place. Our AC2E NEXT dishwasher with integrated heat recovery system has been designed to offer maximum savings and benefits, but above all, to allow staff to focus completely on the event without worrying".

The corner execution P9 prewash module with integrated RED system is a real ally for operators. Innovative and entirely in AISI 304 stainless steel, **the external filtration filter accumulates the soil coming from the prewash module keeping the system clean.** The external filter can be removed and cleaned even while the machine is running.

"The C-SMART control panel with Wi-Fi connectivity" explains Passoni, "allows to manage the dishwasher from anywhere, guaranteeing an impeccable service... And that's not all! The installer and maintenance technician can monitor the operation of all the components of the machine, plan its maintenance based on use, or identify anomalies remotely and manage them in real time ".

But the real magic lies in the EOR, an electro-mechanical control with key activation. "EOR is our ace in the hole", Passoni smiles. "In the event of an emergency or electronic malfunction, it allows the operator to continue operations with optimal performance, with no need for advanced technical skills. Even in the middle of a crowded event, where on average we count 16,000 dishes per banquet, washing continues without problems, allowing staff to manage the emergency without having to interrupt the service and organise maintenance at the best time for the structure".

And so, between the chefs' magic and Comenda's technology, Il Giardino del Mago Receptions continues to enchant and amaze, gifting those who choose to crown their love in this enchanted place with unforgettable moments.

THE REAL SECRET BEHIND IMPECCABLE CLEANING OF CROCKERY
